

U. S. Department of Housing and Urban Development
Washington, D.C. 20410-6000

May 7, 1992

OFFICE OF THE ASSISTANT SECRETARY
FOR POLICY DEVELOPMENT AND RESEARCH

MEMORANDUM FOR: Regional Economists
Field Office Economists

FROM: David E. Shenk, Director, Economic and Market
Analysis Division, TEE

SUBJECT: Transmittal of FY 1992 Income Limits and
Estimates of Median Income

Revised income limits for Public Housing and the Section 8 and Section 235, Section 236, and Section 221(d)(3)(BMIR) programs were approved on May 7, 1992. Attached with this memo you will find:

- Revised Low-Income and Very Low-Income limits
- Revised estimates of median family income for states and areas (Regional economists should already have these)
- Revised Section 235, Section 236, and Section 221(d)(3)(BMIR) income limits
- Signed and dated copies of the associated transmittal memoranda
- Income limit area definitions with listings of metropolitan area county components by State
- An income limits methodology statement and briefing paper that explains how income limits are calculated

You are responsible for providing copies of the income limits, the transmittal memoranda, and the area definitions for your jurisdiction to your CPD and Housing staffs. They, in turn, are responsible for distributions to client organizations.

This year's income limits were calculated in a manner similar to last year's. As was done last year, FY 1992 Low-Income limits are cost-adjusted in the same manner as Very Low-Income limits. This affects a relatively small number of areas where rental housing costs are unusually high or low relative to area median incomes and income limits are, therefore, tied to an affordability measure that uses FMRs. The enclosed income limits briefing package explains the calculations used to set income limits.

You should advise your Housing and CPD program staffs to be certain that income limits sent clients should be accompanied by the dated transmittal memorandum and the geographic definitions of income limit areas. As in the past, you should continue to provide income limits and median incomes requested for HUD programs for areas within your jurisdiction. If numbers for an area outside your jurisdiction are requested, you should refer the caller to HUD USER. HUD USER will answer telephone inquiries on income data, and sell income limits or estimates of median income for all counties in a State or the Nation. HUD USER's toll-free number is 1-800-245-2691 (their Washington, D.C., area number is 301-251-5154).

There are now several non-HUD programs with income limits that are in some manner tied to HUD income limits or estimates of median family income. Some of these income limits differ from anything HUD uses. Many of the inquiries we receive are not for HUD programs, and are made by callers who don't know for what they should be asking. Our advice is that such inquiries should be directed to staff at the appropriate agency who are familiar with related program issues.

May 7, 1992

ASSISTANT SECRETARY
FOR POLICY DEVELOPMENT AND RESEARCH

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

FROM: *John C. Weicher*
John C. Weicher

SUBJECT: Estimated Median Family Incomes for
Fiscal Year 1992

This memorandum transmits median family income (MFI) and income distribution estimates for Fiscal Year 1992 (FY 1992) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs) and nonmetropolitan counties. The estimated median family income for the United States for FY 1992 is \$38,600. Attachment 1 provides median income estimates for States and for the metropolitan and nonmetropolitan parts of each State in the United States.

The FY 1992 MFI estimates were developed for most areas by updating the 1979 median family incomes obtained from the 1980 Census. In seventeen areas where recent American Housing Survey (AHS) data provided statistically significant differences in median family income estimates, the AHS data were used to rebenchmark the estimates. The latest available County Business Patterns earnings data and Bureau of Census Current Population Reports median income data were used to update the 1980 Census or AHS median family income "base" estimates. Attachment 2 provides an explanation of the methodology used to develop these estimates. Attachment 3 provides local estimates of median family incomes.

Please note that the use of the HUD median family income estimates and income limits is subject to individual program guidelines covering definition of income and family, family size, effective dates and other factors. If there are any questions concerning the income estimates that cannot be answered with the information provided, please request your Office's economist to contact his or her Headquarters' counterparts. Public requests for copies of these estimates may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (use 301-251-5154 in the Washington metropolitan area).

Attachment 2

HUD METHODOLOGY FOR ESTIMATING FY 1992 MEDIAN FAMILY INCOMES (ECONOMIC AND MARKET ANALYSIS DIVISION, OFFICE OF ECONOMIC AFFAIRS, PD&R)

The methodology used for estimating the FY 1992 median family incomes (MFIs) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties is based on development of income update factors for each metropolitan area and nonmetropolitan Census County Group. These factors are then applied to 1980 Census median family income estimates or more current estimates based on Census American Housing Surveys.

The income adjustment factors are developed in several steps based on the use of average wage information from County Business Patterns (CBP) data (available for 1979 through 1988), of Census Division MFIs from the Current Population Reports P-60 Series (available for 1979 through 1989), of preliminary P-60 estimates for 1990, and of HUD projections for 1991 and the first part of 1992 based on past P-60 Series trends. The step-by-step normal procedures as well as the exception procedures used are as follows:

- (1) The increase factors for wage increases are calculated for each Census Division for the 1979-1988 period.

$$\frac{\text{Census Division CBP Wages (1988)}}{\text{Census Division CBP Employees (1988)}} = \text{9-year increase factor for Census Division CBP Wages}$$

$$\frac{\text{Census Division CBP Wages (1979)}}{\text{Census Division CBP Employees (1979)}}$$

- (2) The increase factors for the P-60 Series median family incomes are calculated for Census Divisions for the 1979-1989 period.

$$\frac{\text{Census Division P-60 MFI (1989)}}{\text{Census Division P-60 MFI (1979)}} = \text{10-year increase factor for Census Division P-60 Median Family Income}$$

- (3) The indices relating the County Business Patterns data to the P-60 Series data are calculated for the Census Divisions by deriving the ratios of the P-60 Series factors to the County Business Patterns' factors.

$$\frac{\text{10-year increase factor for Census Division P-60 MFI}}{\text{9-year increase factor for Census Division CBP Wages}} = \text{10-year to 9-year ratio of Census Division P-60 MFI to Census Division CBP wages}$$

- (4) The increase factors for the individual metropolitan areas and nonmetropolitan counties are calculated by applying the index factors developed for the Census Division to local County Business Patterns data.

$$\frac{\text{Local CBP Wages (1988)}}{\text{Local CBP Employees (1988)}} * \frac{\text{10- to 9-year ratio of Census Division P-60 MFI to Census Division CBP wages}}{\text{10-year income adjustment factor for MSA or County}} = \text{1979 to mid-1989 MFI adj. factor}$$

$$\frac{\text{Local CBP Wages (1979)}}{\text{Local CBP Employees (1979)}}$$

- (5) March 1991 CPS P-60 survey data on changes in Census Divisional level household incomes between 1989 and 1990 are used to update the "Step 4" 1989 median family income estimates to 1990. (During the 1980's, family and household income changes have been very similar, and data on changes in family incomes for this period have not been released when these estimates are prepared.)

$$\text{Step 4 adj. factor} * (\text{Census Division 1989-1990 changes in median household incomes}) = \text{1979-to-mid-1990 adj. factor}$$

- (6) A projected increase of 4.0 percent in MFI is used for the mid-1990 to mid-1991 period, and an average increase of three-fourths of that amount is used for the following nine months to obtain a mid-FY 1992 estimate. Use of projected increases for the mid-1990 through March 1992 period is necessary because of lags in County Business Patterns and P-60 Series data availability.

$$(\text{Step 5 adj. factor}) * 1.04 * 1.03 = \text{1979-to-mid-1992 adj. factor}$$

- (7) Calculation of median family incomes for FY 1992 is completed by multiplying the 1979 median family incomes obtained from the 1980 Census by the income adjustment factor derived in Step 6.

$$\text{1979 Census Median Family Income} * \text{Step 6 factor} = \text{FY 1992 MFI est.}$$

- (8) If the estimated median family income for FY 1992 is less than the estimate published for FY 1991, the median published for FY 1992 is the same as that published in 1991. Overall Census Divisional increases are capped at 8 percent, and area increases are capped at 10 percent. (Data for areas subject to caps are reviewed each year to ensure that this process does not incorrectly limit legitimate increases, as evidenced by multi-year data patterns.)
- (9) For areas where estimates based on the above procedures differ significantly from those based on current metropolitan American Housing Survey-based estimates updated using CBP and P-60 data, the estimates developed using the above procedures are modified so that they do not differ by more than 6 percent from the AHS-based estimates. A 6 percent range was selected because the true median family income level has a less than 5 percent likelihood of being outside this range.
- (10) For one nonmetropolitan county, Saunders County, Nebraska, the median family income estimate was revised based on the rate of change in wages for the two adjoining metropolitan areas where a large portion of the county's work force is employed.

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

SUBJECT: 1992 Income Limits for Low-Income and Very Low-
Income Families Under the Housing Act of 1937

This memorandum transmits revisions in the income limits used to define the terms "Very Low-Income" and "Low-Income" (formerly "Lower Income") in accordance with Section 3(b)(2) of the United States Housing Act of 1937, as amended. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county in the attached lists. They are primarily used to determine if an applicant for the Public Housing, Section 8, or other program subject to Section 3(b)(2) meets the relevant income eligibility requirement for admission. The revised limits are effective as of the date of this memorandum.

These income limits are based on the HUD estimates of median family income for Fiscal Year 1992. As required by statute, the definition of "Very Low-Income" is tied to 50 percent of the median income for the area, and the definition of "Low-Income" is tied to 80 percent of the median income for the area. The term "area" is defined such that the higher of the local median income or the State nonmetropolitan median income is used in income limit calculations. Using the appropriate median, a four-person income limit is calculated, and adjustments then made for other family sizes. Also, in accordance with the statute, adjustments are made for areas with unusually high or low incomes or housing costs.

The first step in calculating income limits is to calculate what the income limit would be if there were no adjustments for unusually high or low incomes or housing costs. Adjustments are made only if the resulting income limits are outside of formula constraints. More specifically, the Very Low-Income limit for a four-person family normally is set as the higher of:

- 50 percent of the area median family income; or,
- 50 percent of the State nonmetropolitan median family income for the State in which all or most of the area is located; or,

- the income at which 35 percent of income would pay for a unit renting at 85 percent of the typical rent for an existing two-bedroom unit in the area, as measured by the Section 8 Existing Fair Market Rent (FMR) standard.

The purpose of the last calculation is to adjust for areas where rental housing costs are unusually high in relation to the median income level. A parallel adjustment to constrain income limits is made for a small number of areas where rental housing costs are unusually low relative to income levels. The guideline used is that the maximum income limit for a four-person Very Low-Income family is set such that 30 percent of that amount will permit a family to afford a unit renting at 120 percent of the FMR (the statutory rent limit in the Section 8 Existing program). In no instance, however, are adjustments made that reduce income limits below those based on the State nonmetropolitan median income level.

Most Low-Income limits are based on 80 percent of the appropriate area median family income estimate. For areas where Very Low-Income limits were adjusted because of unusually high or low income-to-housing-cost ratios, the Low-Income limits also were proportionately adjusted. The U.S. median family income level of \$38,600 is, as in past years, a "cap" on the four-person limit.

The family size adjustment factors required by statute are intended to provide higher income limits for larger families and lower income limits for smaller families. The factors used are as follows:

<u>Number of Persons in Family and Percentage Adjustments</u>							
<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>
70%	80%	90%	Base	108%	116%	124%	132%

Income limits for families with more than eight persons are not included in the printed lists because of space limitations. For each person in excess of eight, 8 percent of the four-person base should be added to the eight-person income limit. (E.g., the nine-person limit equals 140 percent [132 + 8] of the relevant four-person income limit.) All limits are rounded to the nearest \$50 to reduce administrative burden.

For purposes of HUD programs, income limits approved for Indian Trust Lands remain in effect unless superseded by higher FY 1992 income limits.

HUD Field Offices are responsible for maintaining complete and up-to-date records of all current income limits established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants, and Field Offices should be prepared to make income limits available to the public upon request.

Requests from the public for sets of national or regional income limits may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (301-251-5154 in the Washington, DC area). Questions related to how these income limits apply to the programs of State and other Federal agencies should be referred to those agencies. Questions concerning the methodology used to develop these income limits are addressed in the briefing material supplied to all HUD Field Office economists and also available through HUD USER.

WASHINGTON, D.C. 20410-8000

May 7, 1992

OFFICE OF THE ASSISTANT SECRETARY FOR HOUSING-
FEDERAL HOUSING COMMISSIONER

MEMORANDUM FOR: Regional Administrators
Regional Economists
Field Office Managers
Field Office Economists

FROM:  Arthur J. Hill, Assistant Secretary for Housing-
Federal Housing Commissioner, H

SUBJECT: Approval of Revised FY 1992 Income Limits for
the Section 221(d)(3)BMIR, Section 235, and
Section 236 programs

This memorandum transmits revised income limits used to determine the income eligibility of applicants for projects assisted by HUD under Section 221(d)(3)BMIR, Section 235, and Section 236 of the National Housing Act. These income limits, which are listed by dollar amount and family size, are provided for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county. The revised income limits are effective as of the date of this memorandum.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1992. They are developed in accordance with the requirements of Section 3(b)(2) of the United States Housing Act of 1937, as amended, which establishes the Very Low-Income and Low-Income limits used in the Public Housing and Section 8 programs. By legislation, the income limits for the Section 236 program are the same as the Section 8 Low-Income limits. The legislation governing the Section 235 program states that income limits are to be defined as "95 percent of the median income for the area, as determined by the Secretary with adjustments for larger and smaller families..." The Section 221(d)(3)BMIR program income limits, which are intended to serve "individuals and families of low- and moderate-income," are also set at 95 percent of median, adjusted for family size. In instances where "80 percent of median" is not based on the local median family income estimate, "95 percent of median" is defined in relationship to the "80 percent" number.

The most significant adjustment to these income limits results from a 1987 Housing and Community Development Act amendment to the U.S. Housing Act of 1937. As a result of the amendment, areas which would otherwise have income limits lower than those based on the State nonmetropolitan median family

income level are increased to that level. Income limits for over half of all nonmetropolitan areas are based on the State non metropolitan median income level. This State-level adjustment also has been applied to the small number of metropolitan areas which otherwise would have lower income limits than those of nonmetropolitan counties in the States in which all or most of the metropolitan areas are located.

There will continue to be a small number of areas where minimum income limits based on previously approved guidelines will remain in effect. Higher Section 235 income limits based on relatively high local construction costs, for instance, still remain in effect in many areas.

For areas of unusually high income, the four-person family maximum income limit for the Section 236 program has been set at the national median family income level of \$38,600 or, if higher, at the State nonmetropolitan median family income level. The maximums for the Section 221(d)(3)BMIR and Section 235 programs have been calculated so as to maintain the 80 to 95 percent statutory relationship.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

Number of Persons in Family and Percentage Adjustments

<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>
70	80	90	Base	108	116	124	132

Higher income limits apply to families larger than eight persons, although they are not included in the printed State lists because of space limitations. The limits for families larger than eight persons are determined by using an adjustment of 8 percentage points more for each person beyond the eighth person. For example, the nine-person income limit equals 140 percent of the four-person income limit (i.e., the eight-person limit of 132 percent plus 8 percent for an additional family member). The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up-to-date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all

income limit revisions should be promptly distributed to program participants and Field Offices should be prepared to make income limits available to the public upon request.

If you have any questions concerning these new income limits, please contact your HUD Field or Regional Office economist.
