# Plant & Amenities

**Ductofab** has a colossal plant facility for optimal working and production space, which adds in minimizing the time consumed in production process thus helping deliver material in time. We use world class sheet metal fabrication and profiling technology for achieving new technical standards of modern air distribution systems. A few of them have been mentioned below:

## # PRODUCTOMATIC (AUTO LINE-V):

**AUTO LINE-V** is the basic machine which has the capacity to perform operations for Coil Set, Bead (Stiffening), Notch, Multiple Duct profile blanks, Pittsburgh lock, Transverse duct Flange (T D F), Wrap or L-Shape Bend at different stages on single CNC machine. Human machine interface (H M I) is used to input production data & it utilizes programmable logic controls (P L C) for manufacturing.

**PLASMA PROFILE CUTTING MACHINE:** Excellent cut quality and precision on a wide variety of material which provides the widest range of profiles for all Duct Fittings (elbows, tapers, offsets, branches, dead end, Y-Pieces etc.) & other sections. It has latest software supports and profile cutting (Plasma cutting) technology to optimise each duct profile with specifications and standards.

**DUPLEX TDF ROLLFORMER / TDF CLEAT FORMING MACHINE:** This machine produces TDF flange (Transverse Duct Flanges) that is roll formed on the straight duct and fitting pieces with Same Sheet Technology.

This system provides an air tight connection using 4-Bolt System with Transverse Duct Flange (Connectors).

### **CORNERMATIC**

Corner Matic machine is used to fix T D F corners automatically on duct pieces efficiently and to save on precious time.

### **ZIPLOCKER**

Zip Locker Machine is used to facilitate Boxing of L-Shape / Open Box Straight Hollow Profiles. This machine performs operation to close Longitudinal seam (Pittsburgh lock) with Hydraulic systems to speed up Profile work.

**SPIRAL TUBE FORMER** : This machine is used to form Spiral Round Duct.

**OVALIZER** : This machine is used to form Spiral Flat Oval (Elliptical) Duct
