Changes in IQA parameters - Release of updated CHI specification (version 2.9)

Reference may be taken from our circular No. NPCI/2018-19/CTS/051 dated November 29, 2018 on revised IQA parameters. Banks are advised to validate the instruments on the below mentioned new values as a threshold limit and mark instruments as IQA failed based on the new values only.

This is with effect from January 01, 2019.

DEFECT TEST	On Grey front, Binary front, Binary rear	
	Old value	New value
Exceeds Maximum Image length	215	230
Exceeds Maximum Height	105	110

With warm regards,

Giridhar G. M.

SVP - NACH & CTS Operations
