## **30 leading organizations across real estate, sustainability, and academia commit to advising Fitwel on expansion in Asia**

*Demand for Fitwel in Asia is experiencing rapid uptake, with a 75% increase in project registrations from 2018 to 2019.*

**November 20, 2019, New York, NY**—The Center for Active Design (CfAD), operator of Fitwel, the world’s leading certification system committed to building health for all™, announces today the expansion of the Fitwel Advisory Council with the first regional council—the Asia Advisory Council. One year after Fitwel’s launch in Asia, CfAD convened the region-specific Advisory Council in response to market demand and the identified need for localization. CfAD is committed to supporting Fitwel’s expansion throughout Asia in partnership with UL, the leading safety science organization.

30 industry-leading companies who represent interests across all sectors of the built environment met at two in-person Advisory Council events hosted by CfAD and UL to provide their expertise. Discussion included insights about market potential, the growing demand for health-promoting buildings and communities, and how to support market transformation in Asia.

The formation of Fitwel’s first regional Advisory Council complements the Fitwel Leadership Advisory Board (LAB) and Global Advisory Council founded two years ago. Fitwel continues to be the world’s leading healthy building certification, currently impacting 740,000+ individuals through 940+ registered projects, of which 340+ projects are certified or pending certification.
