Setting up the tutorial in CorelDRAW® 8

1. First open the tutorial file:
   File > Open > tem1cdr.pdf

2. Next, save the file in CorelDRAW format:
   File > Save As > myfile.cdr

*Tip: To make the nodes and
control handles snap to the
template, click: **Layout > Snap To Objects***

To change a node type click the smooth, cusp or symmetrical node button on the Property Bar (below):

3. Next bring up the Object Manager docker:
   View > Dockers > Object Manager

4. In the Object Manager click the pencil icon on layer 1 to lock it:

5. Then click the new layer button to create a new layer:

6. Click the new layer to activate it. Draw on this new layer:

Setting up the tutorial in CorelDRAW® 9

1. First open the tutorial file:
   File > Open > tem1cdr.pdf
