

BASF 13XBF Molecular Sieve

BASF 13XBF Molecular Sieve is a synthetic crystalline aluminosilicate with a regular micropore structure

Zeolite Structure	Faujasite type (FAU)
Pore Size	9 Å (0.9 nm)
Chemical Formula	$\text{Na}_2\text{O} \cdot \text{Al}_2\text{O}_3 \cdot m \text{SiO}_2 \cdot n \text{H}_2\text{O}$ ($m \leq 2.35$)

Product Applications

BASF 13XBF Molecular Sieve is a highly selective adsorbent designed for the elimination of trace contaminants from air, other gases and liquids. It can also be used for the desulphurization (sweetening) of natural gas and other fluids, especially for the removal of mercaptans, and for drying of gases and liquids. This binder-free Molecular Sieve has both higher zeolite content and enhanced availability of the internal pore structure compared to the binder-containing analog, resulting in substantially improved performance.

Another field of application for BASF 13XBF is the non-cryogenic oxygen enrichment from air using pressure (vacuum) swing adsorption (PSA/VPSSA) technique.

Regeneration

Regeneration of BASF 13XBF Molecular Sieve may be carried out by increasing the temperature and/or reducing the pressure or using a suitable purge gas, respectively.

Packaging

- 216 L (135 kg) airtight steel drums
- Polypropylene liner equipped big bags of different sizes (450 – 850 kg net)

Typical Properties

Beads size range, nominal, mm	1.6 – 2.5	2.5 – 5.0
Mesh Range, approx	8 x 12	4 x 8
Bulk Density, compacted, g/L	620-700	620-700
Attrition, % wt.	Max 0.2	Max 0.2
Crush Strength, N/bead	Min 25	Min 45
Moisture Content (as delivered, % wt)	Max 1.0	Max 1.0
Water Adsorption Capacity*, 55% relative humidity, 20 °C, % wt	Min 30	Min 30

* Sample activated. Other beads and sizes available on request.

About Us

BASF is a leading global manufacturer of catalysts for the chemical industry, with solutions across the chemical value chain. The business comprises chemical catalysts and adsorbents, refinery catalysts and custom catalysts. In the process catalysts business, priority is given to developing new and improved products that enable the chemical industry transformation to net-zero emissions.

The division's portfolio also includes battery materials and recycling solutions, as well as environmental catalysts and metal solutions. Customers from a variety of industries including Automotive & Transportation, Chemicals, Plastics or Energy & Resources benefit from our innovative solutions. Further information on BASF's Catalysts division is available on the Internet at www.catalysts.basf.com.
