

C: 0.8

AB: 0.65

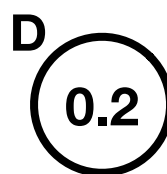

CD: 0.5

A: 0.4

AB: 0.65

A: 0.4

D: 0.2

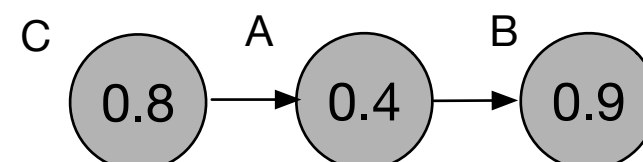

D: 0.2

(a) $\mathcal{L} = \emptyset$

C is selected.

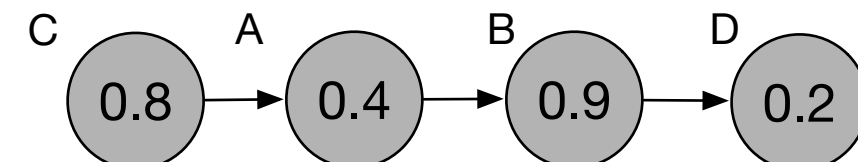

(b) $\mathcal{L} = \{C\}$

A->B are selected.

(c) $\mathcal{L} = \{C, A, B\}$

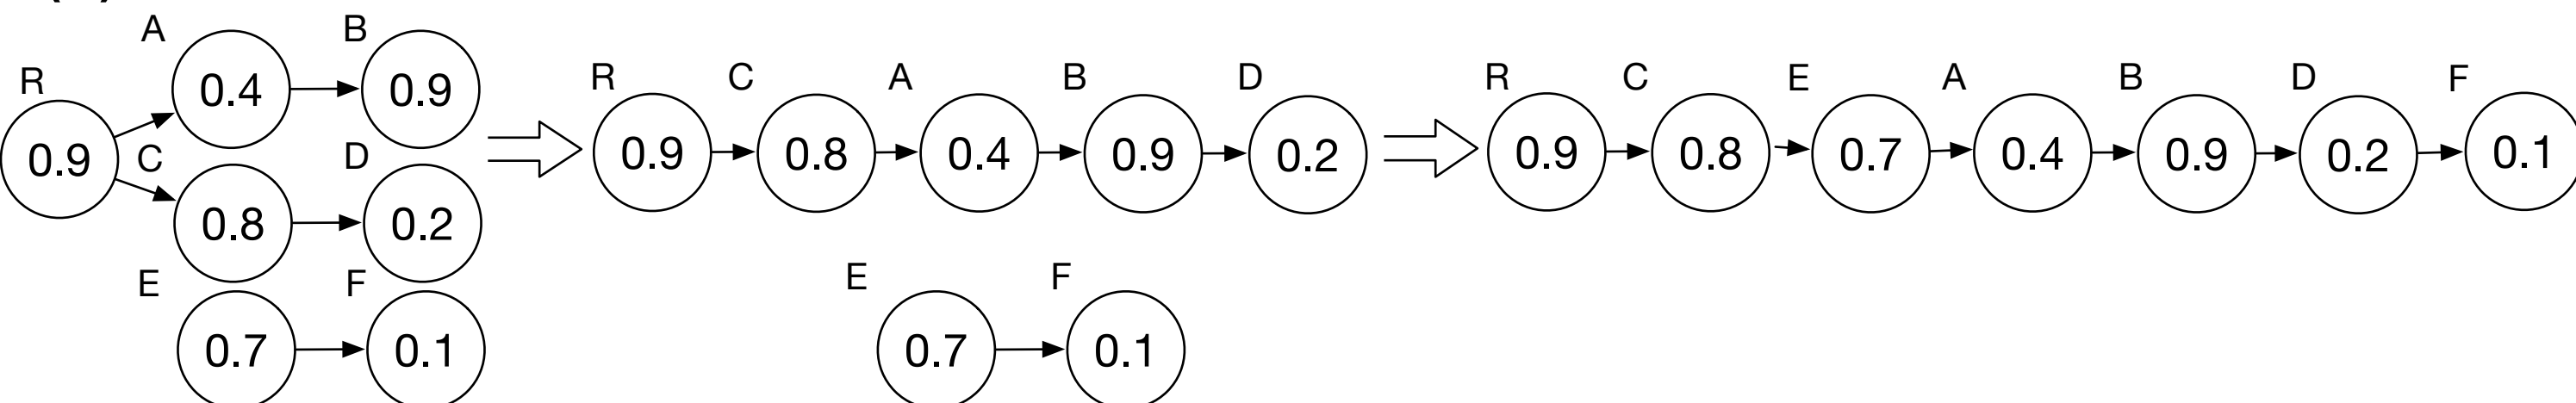

D is selected.

(d) $\mathcal{L} = \{C, A, B, D\}$

Obtain the sorted chain.

(iii)

(a) Apply Algorithm 1 to merge the subchain A->B and the subchain C->D.

(b) Apply Algorithm 1 to merge the chain R->D and the chain E->F.

(c) Obtain the sorted chain.
