

## Iterative Shrinkage and Thresholding Algorithm

**Algorithm:** Input  $\mathbf{x}^0$ , Output  $\mathbf{x}^L$

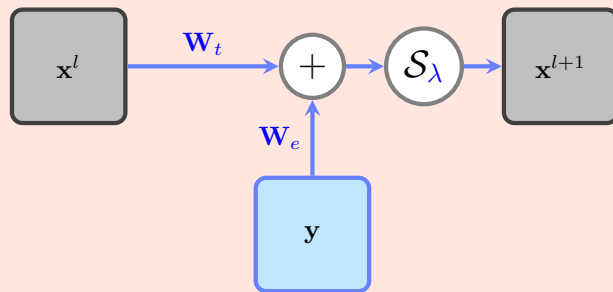

**for**  $l = 0, 1, \dots, L - 1$  **do**

$$\mathbf{x}^{l+1} = \mathcal{S}_\lambda \left( \left( \mathbf{I} - \frac{1}{\mu} \mathbf{W}^T \mathbf{W} \right) \mathbf{x}^l + \frac{1}{\mu} \mathbf{W}^T \mathbf{y} \right)$$

**end for**

$$\begin{aligned} \mathbf{W}_t &= \mathbf{I} - \frac{1}{\mu} \mathbf{W}^T \mathbf{W} \\ \mathbf{W}_e &= \frac{1}{\mu} \mathbf{W}^T \end{aligned}$$
