

$$W(\theta) = \begin{pmatrix} 1 & & & & & & 0 \\ & \ddots & & & & & \\ & & W^1 & & & & \\ & & & W^2 & & & \\ & & & & \ddots & & \\ & & & & & W^k & \\ & & & & & & \ddots \\ & & & & & & & W^{k+1} & \\ & & & & & & & & \ddots \end{pmatrix} \begin{matrix} n = 0 \\ n = 1 \\ n = 2 \\ \vdots \\ n = k \\ n = k + 1 \end{matrix}$$

The diagram illustrates a block-tridiagonal matrix $W(\theta)$ with blocks $W^1, W^2, \dots, W^k, W^{k+1}$ on the diagonal. A red curved arrow labeled φ points from W^1 to W^k . Vertical blue double-headed arrows indicate dimensions d_1, d_2, d_k, d_{k+1} for the blocks. The matrix is indexed by n from 0 to $k+1$.
