TRANSFER OF MAJOR SPACE PROGRAMS

As discussed elsewhere in this report under Space and Related Programs, all funding for the Defense Support Program and the Defense Meteorological Program has been transferred from Other Procurement, Air Force to Procurement, Defense-Wide.

HAC, p. 187

DEFENSE SUPPORT PROGRAM

At the request of the Air Force \$9,000,000 has been added in procurement funds and deleted from research and development funds for the Defense Support Program.

HAC, p. 192 (Def Agencies Proc)

SAC:

Defense support program.-The Air Force budget request includes \$15,102,000 for the defense support program [DSP] early warning system. The committee recommends providing \$24,094,000, an increase of \$8,992,000 above the budget request. The increase is the result of rephasing \$8,992,000 of fiscal year 1995 RDT&E funding to other procurement to accelerate Talon Shield/ALERT as requested by the Air Force. The House centralized DSP other procurement funding into the procurement, defensewide appropriation for major space programs, and recommends \$24,102,000.

SAC, p. 208

WWMCCS/GLOBAL COMMAND & CONTROL SYSTEM

As discussed elsewhere in this report under Command, Control, Communications and Intelligence, a reduction of \$4,200,000 has been recommended from the request of \$12,623,000 for the WWMCCS program.

HAC, p. 187

WWMCCS/GLOBAL COMMAND AND CONTROL SYSTEM

The Air Force requested \$12.6 million in Other Procurement, Air Force in fiscal year 1995 for the WWMCCS program. This line item includes automated data processing equipment for four command and control programs. One of the four programs is for the Air Force Command and Control System (AFC2S) Hardware. According to Air Force officials, AFC2S hardware is required to support software at 13 sites and 105 remote sites.

The fiscal year 1995 budget includes a request of \$4.189 million for AFC2S. However, after the budget was sent to the Congress, the Air Force canceled the program on April 29, 1994, because they considered it to be unexecutable. Accordingly, the fiscal year 1995 budget request for this line item is reduced by \$4.189 million. In addition excess fiscal year 1993 funds of \$746,000 are designated as an item of congressional interest and cannot be reprogrammed without prior congressional approval.

HAC, p. 46

SAC:

WWMCCS/global command and control system.-The Air Force budget request includes \$12,623,000 for automated data processing equipment for four command and control programs. The Committee recommends \$8,434,000, a reduction of \$4,189,000 from the budget request. The House recommends \$8,423,000. The Air Force command and control system [AFC²S] hardware program, one of the four command and control programs, was terminated by the Air Force. Therefore, \$4,189,000 designated for AFC²S in fiscal year 1995 will not be required.

Combat training ranges.-The Air Force budget request includes \$16,989,000 for the joint air combat training system [JACTS] Nellis Air Force Base upgrade. The Committee recommends \$11,689,000, a reduction of \$5,300,000 from the budget request and House allowance. The Air Force informed this Committee of a program delay in awarding the fiscal year 1994 contract for \$5,300,000 which is now estimated for award in fiscal year 1995. The Committee recommends that the Air Force rephase its procurement for fiscal year 1995 as a result of this delay. The Committee also recommends that the Air Force go slow until requirements are determined for the joint Air Force-Navy air combat tactical training range.

Base level data automation program.-The Air Force has requested \$34,093,000 to support its automated baselevel functions. The Committee recommends providing \$31,093,000, a reduction of \$3,000,000 from the budget request and House recommendation. The Committee recommends that the Air Force slowdown development of its baselevel systems modernization efforts and first bring them in line with the mandated Corporate Information Management [CIM] initiative as discussed elsewhere in this report. The reduction is also due to poor program execution performance during fiscal years 1993-94.

SAC, p. 209

FY 1995 CONGRESSIONAL TRACK

the Committee recommends deleting \$256,675,000 until (1) the U.S. Space Command completes its study and provides an architecture, implementation plan, and milestones for achieving consolidation and (2) the Air Force performs a cost and operational effectiveness analysis of alternatives to the existing network that includes a new acquisition using advanced technologies, the Navy's architecture, and a long-term incremental upgrade approach. The Committee also directs the Secretary of Defense to consolidate Air Force and Navy satellite control capabilities and strive toward satellite control convergence with national and civil agencies.

The GAO reports that there is also a potential for performing more cost-effectively the space surveillance mission to detect, track, identify, and catalog all man-made objects in earth orbit. The U.S. Space Command is analyzing requirements and capabilities of existing Air Force, Navy, and Army sensors to perform the mission. The overall goal of the study is unclear. The Committee directs the Secretary of Defense to ensure that the study assesses the most cost effective ways of performing the mission.

THEATER BATTLE MANAGEMENT C2 SYSTEM

As discussed elsewhere in this report under Command, Control, Communications, and Intelligence, \$13,147,000 has been deleted from the request of \$45,547,000 for the Theater Battle Management C² System.

HAC, p. 187

THEATER BATTLE MANAGEMENT C2 SYSTEM

The Theater Battle Management C2 System program requested \$45.5 million in Other Procurement, Air Force to acquire state-of-the-art equipment for worldwide command and control functions. Part of the fiscal year 1995 C2 System budget request is for \$13.1 million to procure four communication suites. Additional software requirements have now been added to the prototyping phase causing the expected procurement and associated funding to be delayed from fiscal year 1995 to fiscal year 1996. The excess \$13.1 million is, therefore, deleted from the fiscal year 1995 budget request for the C2 System.

RADIO EQUIPMENT

As discussed elsewhere in this report under Command, Control, Communications, and Intelligence, the entire \$19,618,000 provided for the Scope Command program is designated as an item of specific congressional interest

HAC, p. 187

RADIO EQUIPMENT

In fiscal year 1995, the Air Force has requested \$19,618,000 in Other Procurement, Air Force, for Radio Equipment. This program is more commonly called Scope Command, and provides resources to modernize the Air Force High Frequency radio communications systems at world-wide locations. Because this program supports communications for the President, the military commanders-in-Chief and other high priority users, the Committee included language in last year's report expressing concern that the Air Force was inadequately supporting modernization of the Scope Command network.

The Committee is encouraged that the Air Force has requested funds for this important effort and has provided the full \$19,618,000 being requested. These funds are also being designated an item of specific congressional interest and may not be used for any other purpose without specific Committee approval.

ANTI-JAM VOICE

As discussed elsewhere in this report under Command, Control, Communications, and Intelligence, the entire \$390,000 requested for the Anti-Jam Voice program has been deleted.

HAC, p. 188

ANTI-JAM VOICE

The fiscal year 1995 budget request shows that the Air Force planned to use Other Procurement, Air Force funds to buy 714 SINCGARS-V radios using fiscal years 1994 and 1995 funds at a combined cost of \$10.304 million. With the fiscal year 1994 funds, the Air Force planned to buy 696 radios for \$9.914 million, or \$14,244 per radio. It planned to buy another 18 radios with the fiscal year 1995 funds for \$390,000, or \$21,667 per radio. However, the Air Force obtained better prices than originally estimated.

After the budget was submitted to the Congress, the Air Force purchased 485 radios in April 1994 for \$5.816 million at a unit cost of \$11,992. The Air Force now expects to buy an additional 222 radios in July 1994 for \$2.662 million at a unit cost of \$11,992. Air Force officials stated this action will buy out its SINCGARS requirement.

Because the Air Force is buying out its SINCGARS requirement in fiscal year 1994, the fiscal year 1995 budget request of \$390,000 is not needed and has been deleted. Also, \$1.436 million of the fiscal year 1994 funds are designated an item of congressional interest and cannot be reprogrammed without prior congressional approval. This represents the difference between the \$9.914 million appropriated to the Air Force in fiscal year 1994 funds and the \$8.478 million which they now expect to expend using current contract prices for the April and July 1994 buys.

HAC, p. 46-47

COMMUNICATIONS ELECTRONIC MODIFICATIONS

The Air Force budgeted \$18,850,000 for Communications Electronic Modifications. Because of the availability of funds resulting from lower than anticipated costs, the Committee recommends \$18,100,000 for the Communications Electronic Modifications program, a reduction of \$750,000 from the budget request.

HAC, p. 188

COMMUNICATION-ELECTRONIC MODIFICATIONS

Historically, eleven electronic modifications are included under this line item. A total of \$18.9 million is requested in Other Procurement, Air Force in fiscal year 1995 for six modifications, with the other five receiving funding in prior years.

The MPN 14K Landing Control modification is substantially complete. Prior year funds of \$1,175,000 are not needed to complete this modification because the work has cost less than anticipated. To date over \$400,000 of fiscal year 1993 funds were reprogrammed from this line, and it is anticipated that \$750,000 of fiscal year 1994 funds will be excess to the requirement. The fiscal year 1995 appropriation is, therefore, reduced by that amount to reflect the excess funds that will be carried over and available to satisfy the fiscal year 1995 requirement.

HAC, p. 45

OTHER BASE MAINTENANCE AND SUPPORT PROGRAM
ITEMS LESS THAN \$2,000,000

The Air Force budgeted \$11,667,000 for Items Less Than \$2,000,000 in the category of test equipment. Because of lower than anticipated requirements, the Committee recommends a reduction of \$1,100,000 from the budget request.

The Committee supports the Air Force's two level maintenance concept and would like to pursue solutions which reduce turnaround time at the depots, and also reduce the numbers of components evacuated unnecessarily to the depot-reducing spares inventory requirements.

The Committee is aware of an NDI system available in industry called the Organizational Maintenance System. It consists of a Universal Hydraulics Test System and a Digital Multimedia Information System. The Committee recommends an increase of \$100,000 to evaluate the cost-saving potential of this system. The Committee recommends a total of \$10,667,000 for Items Less Than \$2,000,000 in Other Base Maintenance and Support.

NATURAL GAS VEHICLES

The Committee recommends \$10,000,000 for the Office of Environmental Security for procurement of natural gas vehicles (NGVs) to continue the DOD fleet conversion program that implements the Energy Policy Act and Executive Orders to accelerate purchase of alternatively fueled vehicles.

The Clean Air Act Amendments of 1990 encourages and the Energy Policy Act of 1992 requires increasing use of alternatively fueled vehicles by Federal fleets, particularly those operating in National Ambient Air Quality Nonattainment Areas. Executive Orders 12759 (April 17, 1991) and 12844 (April 21, 1993) accelerate the timetable for purchase of alternatively fueled vehicles. The DOD is the Federal Government's major motor vehicle fleet manager and is planning to comply with these Executive Orders and environmental standards in part through conversion of selected vehicle fleets to dedicated NGVs.

The Committee strongly endorses these efforts. Natural gas burns significantly cleaner than gasoline and is the cleanest burning alternative fuel available today. NGVs are well suited for meeting environmental compliance requirements. Increased use of natural gas as a transportation fuel also enhances energy security and improves our trade balance, because it is abundant and readily available in the United States.

HAC, p. 192 (Def Agencies Proc)

NATURAL GAS COOLING EQUIPMENT

The Committee recommends an increase of \$18,000,000 in various accounts for continued procurement, installation and related costs of natural gas fired absorption, engine-driven, and desiccant cooling equipment. Advanced technology equipment has recently entered the market place and is now commercially available to the DoD. To maximize exploitation of these advanced technologies, the Committee directs that these cooling equipment funds be made available for the acquisition of source energy efficient cooling equipment that has been commercially available for less than two years; and directs consultation with the Department of Energy on technologies to be given priority. This is an item of special interest to the Committee.

Partly as a result of very significant Federal investment in the past, energy efficient and reliable natural gas utilization equipment is now in the early stages of production and available to the Department of Defense. This equipment is energy efficient, reliable, and environmentally benign. Its use enhances DoD compliance with national and local environmental standards, including the phase out of ozone depleting chemicals, and reduces the risk of area-wide brown and blackouts by relieving strain on local electric grids. It also enhances energy security and improves our trade balance, since the United States

FY 1995 CONGRESSIONAL TRACK

produces virtually all of the natural gas it uses. The Committee's recommended increases include \$5,000,000 in Other Procurement, Army, \$8,000,000 in Other Procurement, and Navy, \$5,000,000 in Other Procurement, Air Force.

HAC:

MOBILITY EQUIPMENT

The Air Force budgeted \$12,807,000 for the Mobility Equipment program. A wide variety of equipment such as refueling systems, runway repair systems and revetments are procured in this program. The Air Force has encountered slippage in two of the subprojects in this program. Because of problems with the technical package for runway repair kits, the Committee recommends a reduction of \$2,400,000 for that subproject. Because of slippage in contracting for the revetment subproject, the Committee recommends a reduction of \$1,900,000. A total of \$8,507,000 is recommended for Mobility Equipment, a reduction of \$4,300,000 from the budget request.

ITEMS LESS THAN \$2,000,000

The Air Force budgeted \$18,244,000 for twenty-two subprograms in the Items Less Than \$2,000,000 in the category of Base Support Equipment. Because of changed requirements since the budget was submitted and reduced prices for other items in this program, the Committee recommends \$12,144,000 for Items Less Than \$2,000,000 a reduction of \$6,100,000 from the budget request.
