Dr. Neil J.A. Sloane
AT&T Bell Labs, Rm. 2C-376
Murray Hill, NJ 07974

Dear Neil,

I enclose a copy of the preliminary draft of something I mentioned to you in Veldhoven. Specifically, the sequence (*) on page 3 is a candidate for inclusion in the next edition of your *Handbook*. I would also be interested in any references or other comments concerning the substance of the paper. Both halves of the "proof" of Theorem 5 depend on unproved conjectures. I suspect that this should not be too difficult to remedy.

Sincerely,

Solomon W. Golomb
