\* Each player must choose a different character.

### ❖ Join Button

If a game is already in progress, 2P can press the Join button to select a character and enter the ACT.

## How to Play

Basic gameplay is identical to single player play. Characters who exit the screen or who have taken damage will be placed in a standby state, but can rejoin by pressing the Join button. You can Return as many times as you like, but if the last remaining character on-screen takes damage, you will all lose a try.

If you find parts of the ACT difficult to go alone, you can always ask other players to go ahead in your place. Some ACTs are easier to clear using specific character abilities, so try experimenting with varying character combinations.

\* Tails, who is able to airlift companions, is recommended for beginners.

## Leaving a Game

Players other than 1P can press and hold the Leave button to exit cooperative play. This can be performed either at the World Map or during the ACT.

# Advice

- **Proceed to Bridge Island**

This is the first Zone you need to play. There are many sections where you move at high speed, so be careful not to run head first into an enemy or trap. At the end of ACT 1, a large mecha will chase you along an uneven terrain. Use jumps or flight as you run to avoid losing speed as you clear hazards.

- **Find the Boss's Weakness**

The bosses waiting at the end of the ACTs will launch more powerful attacks than regular enemies. Pay close attention to the way they move, and aim for weak points that momentarily appear, or use the boss's own attacks against them.

- **Collect Chaos Emeralds**

Collect all the Chaos Emeralds to enable your transformation into Super state. Transformation can be performed from the Emerald Power Ring menu when you have 50 or more Rings.
