

Acknowledgments

The design and content of *The Unicode Standard: Worldwide Character Encoding, Version 1.0*, are the responsibility of the Unicode Technical Committee, composed of representatives from many different companies. These representatives include: Joan Aliprand (Research Libraries Group), Lloyd Anderson (Ecological Linguistics), Joe Becker (Xerox), John Bennett (Go), F. Avery Bishop (DEC), Joe Bosurgi (Go), Juan Bulnes (Novell), Jim Caldwell (Pacific Rim Connections), Layne Cannon (WordPerfect), Lee Collins (Apple), Mark Davis (Apple), Wayne Davison (Research Libraries Group), Bill English (Sun Microsystems), Asmus Freytag (Microsoft), Anas Jarrah (Aldus), Phil Karren (Novell), Mike Kernaghan (Metaphor), Rick McGowan (NeXT), Pamela Ottaviano (Microsoft), Isai Scheinberg (IBM), Stuart Smith (WordPerfect), Michel Suignard (Microsoft), Karen Smith-Yoshimura (Research Libraries Group), Bill Tuthill (Sun Microsystems), J. G. Van Stee (IBM), Ken Whistler (Metaphor), Eric Wilson (Lotus), and Glenn Wright (Sun Microsystems).

The production of this standard has required the dedication of many individuals over considerable time. The contributions of the following people were central to the design and authorship of this book: Joan Aliprand, Joe Becker, Lee Collins, Mark Davis, Asmus Freytag, Rick McGowan, and Ken Whistler. The development and maintenance of the Unicode character standard databases and character mappings are principally due to the efforts of Joe Becker, Lee Collins, Ken Whistler, Cora Lee, Pamela Ottaviano, Michel Suignard, and Isai Scheinberg.

The Han databases also benefitted from major contributions as the result of collaboration with the Unicode CJK Unification Verification Project (University of Toronto, Department of East Asian Studies): Professor Kazuko Nakajima (team leader), Dr. Xiao-jie Yang (principal investigator), Mr. Charles Chan, Mr. Jian Zhao, Mrs. Hye-young Im, and project consultants Prof. Wayne Schlepp (University of Toronto, East Asian Studies), Mr. Jack Cain (Utlas International), and Mr. Jae Chong (Hahn Computer Institute); and with the Center for Computer and Information Research and Development (CCID): Mr. Zhang Zhoucai, Ms. Huang Weimin, and with Mr. Zhu Yan (National Library of China).

Significant contributions of time and energy to the creation or review of *The Unicode Standard: Worldwide Character Encoding, Version 1.0* have also been made by the following people: Mati Allouche (IBM), David J. Birnbaum (University of Pittsburgh), Robin Cover (University of Texas, Arlington), Cuong T. Nguyen (Stanford), Burwell Davis (Adobe), James Do (SCS), Madjid Dormi-ani (Apogee), Peter Fenwick, Lars Erik Fredriksson (Far Eastern Library, Stockholm), Adiva Gera (IBM), Alaa Ghoneim (IBM), Wassef Haroun (Microsoft), Maha Hassan, Masami Hasegawa (DEC), John Jenkins (Apple), Yasuo Kida (Apple), Haesung Kim (Apple), Kyongsok Kim

(University of North Dakota), Takao Kitano (Microsoft), Mike Ksar (HP), Huan Mei Liao (Apple), Sten Lindberg (IBM), Doug Merritt, Sherif El-Rafei (IBM), Jony Rosenne (IBM), Hugh MacGregor Ross, Mohamad Saba (Apple), Gidi Shalom-Bendor (Apple), Thanh Van Nguyen (Sun), Tuoc V. Luong (Pyramid), Dimitri Vulis (City University of New York), Joan Winters (SHARE), Tom Yap (Sun), and hundreds of other people who have supplied additional feedback on successive drafts of *The Unicode Standard: Worldwide Character Encoding, Version 1.0*. These people are not responsible for errors or omissions in this work.

Editorial work is due principally to the efforts of Erica Liederman. The book was designed and typeset by Burwell Davis (Adobe). Thanks also go to Madeline Weisey for her work in mailing draft standards worldwide.

The support given to creation of *The Unicode Standard: Worldwide Character Encoding, Version 1.0* by the member corporations has been crucial to its development, especially the considerable backing in facilities, equipment, and resources supplied by Apple, IBM, Metaphor, Microsoft, The Research Libraries Group, Sun Microsystems and Xerox. Finally, the members of the board of directors of Unicode, Inc. must be acknowledged for their support and promotion of the Unicode standard: Robert M. Carr, John Gage, Richard J. Holleman, Charles Irby, Jay E. Israel, Paul Maritz, David Richards, Lawrence Tesler, and Bud Tribble.
