

Indices

I.1 Unicode Names Index

The Unicode Names index contains three types of entries.

- Formal character names—all uppercase
- Alternative character names (aliases)—all lowercase
- Character group names—mixed case (titlecase)

Formal character names are unmodified from the character names lists, although the name strings may be indexed by different words in the names. Alternative character names and character group names are occasionally modified slightly to make them understandable out of context (for example, from “Hangul” to “Korean Hangul”).

Not every character is indexed. Large groups of similar characters, including CJK ideographs, Korean Hangul syllables, and compatibility characters, are indexed by their character group names, such as block names, subblocks, alphabet names, relevant standards, or group summaries (for example, “Roman Numerals”).

Neighboring paired characters (such as capital/small case pairs, mathematical symbols and their negations, and left/right brackets) are generally indexed under only one member of the pair.

This PDF file is an excerpt from *The Unicode Standard, Version 3.0*, issued by the Unicode Consortium and published by Addison-Wesley. The material has been modified slightly for this online edition, however the PDF files have not been modified to reflect the corrections found on the Updates and Errata page (see <http://www.unicode.org/unicode/uni2errata/UnicodeErrata.html>). More recent versions of the Unicode standard exist (see <http://www.unicode.org/unicode/standard/versions/>).

Many of the designations used by manufacturers and sellers to distinguish their products are claimed as trademarks. Where those designations appear in this book, and Addison-Wesley was aware of a trademark claim, the designations have been printed in initial capital letters. However, not all words in initial capital letters are trademark designations.

The authors and publisher have taken care in preparation of this book, but make no expressed or implied warranty of any kind and assume no responsibility for errors or omissions. No liability is assumed for incidental or consequential damages in connection with or arising out of the use of the information or programs contained herein.

The *Unicode Character Database* and other files are provided as-is by Unicode®, Inc. No claims are made as to fitness for any particular purpose. No warranties of any kind are expressed or implied. The recipient agrees to determine applicability of information provided.

Dai Kan-Wa Jiten used as the source of reference Kanji codes was written by Tetsuji Morohashi and published by Taishukan Shoten.

This book is set in Minion, designed by Rob Slimbach at Adobe Systems, Inc. It was typeset using FrameMaker 5.5 running under Windows NT. ASMUS, Inc. created custom software for chart layout. The Han radical-stroke index was typeset by Apple Computer, Inc. The following companies and organizations supplied fonts:

Apple Computer, Inc.
Atelier Fluxus Virus
Beijing Zhong Yi (Zheng Code) Electronics Company
DecoType, Inc.
IBM Corporation
Monotype Typography, Inc.
Microsoft Corporation
Peking University Founder Group Corporation
Production First Software

Additional fonts were supplied by individuals as listed in the *Acknowledgments*.
