The VLDB Journal

The International Journal on Very Large Data Bases

SCOPE AND PURPOSE

The Journal is a quarterly publication of the VLDB Endowment. As a database systems journal it is dedicated to the international publication of scholarly contributions to the advancement of information system architectures, the impact of emerging technologies on information systems, and the development of novel applications. It presents significant advances in the design, implementation, and evaluation of systems for databases and for other information collections. Its scope ranges from the development of special-purpose hardware, the design of innovative software approaches, integrated system architectures, the design analysis and performance evaluation of systems to new techniques for presenting and capturing information.
