Faucet Water Purifier NP180 / NP200

# WATER

## The Substance Of Life

Water is one of the most important nutrient the body needs. In fact, about 70% of the human body is made up of water and it is required for circulation, respiration as well as for converting food to energy. While an average adult loses about 2.5 litres of water a day through respiration, perspiration, it is vital to keep our body sufficiently hydrated to replenish the fluids lost.

SINCE THE WATER WE DRINK PROVIDE FOR CELL FUNCTION & ITS VOLUME REQUIREMENTS, THE DECREASE IN OUR DAILY WATER INTAKE AFFECTS THE EFFICIENCY OF CELL ACTIVITY.

Dr Fereydoon Batmanghelidj, author of "Your Body's Many Cries for Water"

# The Foundation Of A Healthy Body

Apart from needing water to restore natural hydration levels, it is also required to perform some primary bodily functions, such as:

01

## MAINTAINING CELL LIFE

Water is essential for cellular health and regulating all the functions in the human body.

02

## SUPPORTING CHEMICAL AND METABOLIC REACTIONS

Aiding to regulate body metabolism, water participates in the biochemical breakdown of what we eat.

03

## TRANSPORTING OF NUTRIENTS AND REMOVAL OF WASTE

Water helps transport nutrients throughout the body as well as removal of waste product from the system.

04

## REGULATING BODY TEMPERATURE

Through sweat production, the body is able to release heat and cool down naturally.

05

## FORMING FLUIDS THAT LUBRICATE THE JOINTS

Water is the main lubricant in the joints, providing for necessary cushioning.

Since water has significant effects on our physiology, the quality of the water we consume is just as important as its quantity to ensure that our body gets the essential minerals required for good health.

# KNOWING YOUR WATER

There are many drinking water options available, and each has its own distinctive qualities as shown

## TAP WATER

pH 6.8 to 8.5  
ORP +100 to +300 mV

## BOILED WATER

pH: 6.8 to 8.5  
ORP +150 to +350 mV

## DISTILLED WATER

pH 6.0 to 6.5  
ORP +100 to +300 mV

## PURIFIED WATER

pH 7.0 to 8.0  
ORP +150 to +250 mV

## ALKALINE ANTIOXIDANT WATER

pH 8.5 to 10.0  
ORP -50 to -400 mV

# Alkaline By Design & Acidic By Function.

For its systems to function properly, the body prefers a slightly alkaline profile. At the same time, acidic by-products are produced from metabolic processes. Where a healthy body should be mildly alkaline with a pH level of 7.35 to 7.45, a slight acidic blood pH may pose some health concerns and tilt the acid-alkaline balance.

## Are You Acidic Or Alkaline?

### 01 SALIVA TEST

pH 7.00 - 7.50

Provides a quick indication of your current health status, gauging from the amount of alkaline mineral reserve in the body.

### 02 BLOOD TEST

pH 7.35 - 7.45

Commonly practised in hospitals or clinics, this is the most accurate method to determine the body pH.

### 03 URINE TEST

pH 6.4 - 6.8

Used to test if your body is discharging an acceptable quantity of acidic waste.

## What Makes You Acidic?

### 01 INBORN

A baby may have an acidic profile, potentially an inherited trait from the mother during pregnancy, deprivation of oxygen during labour or due to acid reflux.

### 02 MODERN LIFESTYLE

Liquor, smoke, stress and irregular sleeping hours may give an acidic profile. Additionally, naturally occurring free radicals produced in excess induces oxidative stress to the body.

### 03 MODERN DIET

70% to 80% of our modern diets such as meats, processed food, sugar, liquor, coffee, soft drinks are acid forming food. Fresh fruits and vegetables which are consumed in a lesser amount may possibly develop an overall acidic pH profile.

# Understanding pH & PRAL

Potential Renal Acid Load (PRAL) is a calculated value to assess the effects of food on body's pH based on 5 nutrient values. Food with negative PRAL scores is alkaline, and those with a positive PRAL score is acidic.

## ALKALINE

					
<b>-21</b>	<b>-14</b>	<b>-12</b>	<b>-7.3</b>	<b>-6.5</b>	<b>-5.5</b>
RAISINS	SPINACH	PARSLEY	BASIL	BLACKCURRANT	BANANA
					
<b>-4.8</b>	<b>-4.1</b>	<b>-2.9</b>	<b>-2.5</b>	<b>-2.2</b>	<b>-1.6</b>
CARROT JUICE	KIWI FRUIT	ORANGE JUICE (unsweetened)	LEMON JUICE	APPLE JUICE (unsweetened)	WINE VINEGAR

## ACIDIC

WHITE BREAD	WHITE RICE	MACARONI	SPAGHETTI	BEAF LEAN	PORK LEAN
					
<b>8.7</b>	<b>13.5</b>	<b>15.3</b>	<b>18.2</b>	<b>23.4</b>	<b>28.7</b>
CHICKEN	SARDINES IN OIL	MUSSELS	TIGER PRAWN	EGG YOLK	PROCESSED CHEESE

### PRAL EQUATION

$0.49 \text{ protein} + 0.037 \text{ Phosphorus} - 0.021 \text{ Potassium} - 0.026 \text{ Magnesium} - 0.013 \text{ Calcium}$

# Understanding Antioxidant & ORAC

Oxygen-Radical Absorbance Capacity (ORAC) test is also a standard method to evaluate the overall antioxidant power of food and supplements. The higher the ORAC scores, the more antioxidant power the food or supplement contains.

## HYDROPLUS® PROPERTY 01

# ALKALINE WATER

Water is enhanced with alkaline properties through a continuous electrolysis process or HydroPlus® elements. Fortifying the water with natural beneficial alkaline minerals, it promotes body pH balance by neutralising excess acidic wastes build-up.

### HOW DO I KNOW IF MY WATER IS ALKALINE?

It's simple! Drip a few drops of pH test reagent into the water for a quick comparison of the colour change to the pH chart. Alternatively, you may also use a digital pH meter to display the pH reading with higher accuracy and precision.

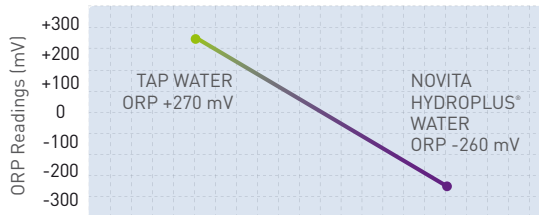

## HYDROPLUS® PROPERTY 02

# HYDROGEN WATER

Unlike regular water, HydroPlus® Water contains an abundance of Hydrogen (H<sub>2</sub>) which is a strong antioxidant with high reduction potential to neutralise and counteract harmful oxidative effects of highly reactive and unstable free radicals. This in turn helps slow down the oxidation process.

Normal Tap Water vs HydroPlus® Water ORP

ORP  
-300 mV  
↑  
**HIGH ANTIOXIDANT**  
(Higher ability to slow down oxidation)

ORP  
-150 mV

ORP  
+100 mV

ORP  
+150 mV

**OXIDATION**  
(Higher rate of oxidation)

ORP  
+300 mV  
↓

## HOW CAN I BE SURE THAT HYDROPLUS® WATER SLOWS DOWN OXIDATION?

Soak an iron nail in tap water and HydroPlus® Water and observe the rusting process. Hydrogen in HydroPlus® Water is able to counteract free radical damage to slow down the oxidation thus minimising rusting (oxidation). An Oxidation-Reduction Potential (ORP) meter can also be used to test for the presence of antioxidant in water by measuring the ORP reading. A negative ORP reading indicates high antioxidant capacity, while positive ORP indicates a high rate of oxidation

### ELECTROLYSIS REACTION PROCESS

At Cathode:  $2\text{H}_2\text{O} + 2\text{e}^- > \text{H}_2(\text{g}) + 2\text{OH}^-$   
(Generating Alkaline Antioxidant Water)

At Anode:  $\text{H}_2\text{O} > \frac{1}{2}\text{O}_2(\text{g}) + 2\text{H}^+ + 2\text{e}^-$   
(Generating Acidic Water)

## HYDROPLUS® PROPERTY 03

# HYDRATING WATER

HydroPlus® water has a smaller water molecule cluster size of 5-6 water molecules that will allow better penetration into body cells for delivering the essential minerals and nutrients. The body will resultantly become more hydrated from the enhanced solubility and permeability, which also aids in flushing out the acidic waste more easily.

### WHAT BENEFITS DO THE SMALLER WATER MOLECULE CLUSTER SIZE OF ALKALINE ANTIOXIDANT WATER BRING?

HydroPlus® water can effectively penetrate oil particles, emulsifying it. Proving its high solubility and good permeability, HydroPlus® water can be better absorbed into the body for enhanced hydration and detoxification.

### HOW DOES HYDRATION START FROM CELLS?

Water makes up 80% to 97% of the cytoplasm within the cell membrane, where multiple cellular processes take place. When cells are dehydrated, transfer and delivery of nutrients is obstructed and the brain will also send out thirst signals.

## HYDROPLUS® PROPERTY 04

# OXYGENIZING WATER

HydroPlus® Water contains abundance of hydroxyl ions (OH<sup>-</sup>) that is also an antioxidant component. The reaction between hydroxyl ions (OH<sup>-</sup>) and naturally forming free radicals (O<sub>2</sub><sup>-</sup>) gives more dissolved oxygen (O<sub>2</sub>) that is delivered to the bloodstream. Besides energising and revitalising the body, blood circulation also improves, and body metabolism increases.

### HOW DO I KNOW IF BLOOD CIRCULATION IS IMPROVED?

#### Test 01 // Capillary Nail Refill Test

Nails provide a quick indication of your overall health status. The capillary nail refill test is a quick indication of your blood flow to tissues and you can also monitor your dehydration level.

Here's how you can do it,

Step 01: Press down a fingernail, maintain this pressure until the nail turns white.

Step 02: Release the pressure on the nail and observe the time required for it to turn to a healthy pink again. If blood circulation is good, the nail would turn pink within 2 seconds or less. But when blood circulation is compromised, the nail capillary refill time will be longer.

#### Test 02 // Micro-Circulation Microscope Test

Simply insert a finger into the holder below the optical lens apparatus, adjust to fix the focal length to visualise the blood capillary shape, blood flow pattern and capillary morphology.

# HydroPlus® Alkaline Antioxidant Water Benefits

## RESTORE PH BALANCE

The modern diet and lifestyle choices we make may increase acidic waste accumulated in the body. This also translates to a higher chance of developing an overall acidic pH profile. With HydroPlus® Alkaline

Antioxidant Water, its alkaline properties can neutralise excess acidic waste to promote body pH balance, promoting overall wellness.

## SLOW DOWN AGING

Aging is a natural process arising from damage to bodily tissues by organic acids and active oxygen. Antioxidants help stabilise these highly reactive and unstable free radicals with its abundance of hydroxyl ions. While slowing down oxidation and ageing process, it also acts as a preventive measure against other chronic diseases.

## MORE HYDRATING

Often, we are not sufficiently hydrated or drinking enough water. Unlike regular water with an average cluster size of 12-13 water molecules, HydroPlus® Alkaline Antioxidant Water has a cluster size of 5-6 water molecules. This translates to improved tissue and cell penetration, as well as nutrients and oxygen delivery within the body.

## ENERGIZE & REVITALIZE

Insufficient oxygen in cells and tissues links to many and quite possibly all health problems and diseases. HydroPlus® Alkaline Antioxidant Water with its antioxidant properties converts free radicals into stable oxygen molecules. The body is energised, revitalised and both body metabolism and immune system are boosted as well.

## DETOXIFY

Majority of the food we consume tend to be highly acidic. Alkalinity from HydroPlus® Alkaline Antioxidant Water promotes a balanced body pH by neutralising the excess acidic waste and its smaller water molecule clusters helps expel and flush the excess acidic waste out of the body system more easily.

## BOOST IMMUNE SYSTEM

The body's immune system is important for fighting against infectious organisms.

However, it can be weakened by acidic properties from modern lifestyle and diet choices. HydroPlus® Alkaline Antioxidant Water ensures stable oxygen levels that help boost the body's immune system and increase resilience against infections.

## BETTER RESTFUL SLEEP

From recent research findings, people toss and turn at night due to dehydration. In fact, the instant you feel thirsty implies that you are already dehydrated. HydroPlus® Alkaline Antioxidant Water's micro-water molecules cluster size allows water to be easily absorbed at the cellular level thus hydrating the body more effectively while also giving a more restful sleep.

## FASTER RECOVERY TIME

Alkalinity from HydroPlus® Alkaline Antioxidant Water and its smaller water molecule cluster size keeps you hydrated, shorten muscle recovery time and reduce muscle soreness. Antioxidant properties from the water also help the body counteract excessive production of free radicals during an extensive workout.

## BETTER DIGESTIVE HEALTH

Alkaline water helps restore and maintain your digestive health by reducing bloating and improving bowel movement. It is recommended to drink alkaline water 30 minutes before mealtime. While maintaining the stomach's acidic pH, alkaline bicarbonate buffer will be generated and will enter into the bloodstream for a net gain of alkalinity.

## REDUCE RISK OF FIBROMYALGIA

Fibromyalgia is a disorder characterized by musculoskeletal pain, fatigue, sleep, mood swings and decreased alertness and may also arise when there is excess acidity in the body tissues. HydroPlus® Alkaline Antioxidant Water can help neutralise and flush out the excess acidity from the body tissues.

## REDUCE RISK OF OSTEOPOROSIS

Our skeletal system is primarily made up of alkaline minerals such as calcium, magnesium and potassium. When acidity accumulates, your body may take calcium minerals from the bones to restore the pH balance while also increasing the risk of developing osteoporosis. The body can also obtain these essential alkaline minerals from HydroPlus® Alkaline Antioxidant Water.

# WATER FOR LIFE

## GIFTED BY NATURE & ENHANCED BY SCIENCE

WITH HYDROPLUS® PREMIUM WATER IONIZERS

Obtain 7 types of functional water at precise pH levels with the novita HydroPlus® Premium Water Ionizer.

Dispense your choice of alkaline, purified and acidic water from this water ionizer alone. More than just for drinking, also extend your usage to your cooking and cleaning as well.

陈慧敏  
Kit Chan

KIT CHAN  
SINGER/ACTRESS  
NOVITA BRAND AMBASSADOR

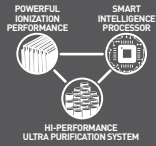

Find reliability in the novita HydroPlus® Premium Water Ionizer NP10000 that gives alkaline antioxidant water of the highest quality possible from a powerful ionization performance, enhanced stability and prolonged durability system.

Brimming with alkaline antioxidant properties, hydrate your body better and feel energized and revitalized every day. Giving you 7 types of functional water, indulge for a whole new drinking experience today.

## ADVANCED CONFIGURATION

**HydroPlus®**  
PREMIUM KEDA CERTIFIED MEDICAL DEVICE

## RELIABILITY IN THE SCIENCE & TECHNOLOGY

Delivering a powerful ionization performance with enhanced stability and a prolonged durability system, this water ionizer is also complimented with a Hi-Performance Advanced Ultra-Hollow Membrane Filter to assure of the highest water quality standard possible.

### POWERFUL IONIZATION PERFORMANCE

The 7 platinum-titanium electrode plates underwent a baking process to facilitate better integration. This gives a more powerful ionization performance, enhanced stability and prolonged durability system.

### SMART INTELLIGENCE PROCESSOR

The smart intelligence processor delivers an optimized ionization process. Producing a precise electrical flow voltage through the electrolytic chamber cell, water molecules (H<sub>2</sub>O) are separated into acidic (H<sup>+</sup>) and alkaline (OH<sup>-</sup>) water.

### HI-PERFORMANCE ULTRA PURIFICATION SYSTEM

The advanced ultra-hollow membrane filter removes 99.9% E.Coli and Staphylococcus Aureus bacteria, based on a pore size of 0.1 microns by Korea Testing & Research Institute (KTR). Suspended colloids are removed while the essential minerals are kept intact.

## 7 TYPES OF FUNCTIONAL WATER

Get the most out of your water every day! From the 7 different levels to choose from, include this quality water goodness into your drinking, cooking and cleaning. Feel the difference and complete your experience today!

01 Save the hassle from traditional methods of removing chlorine and impurities through boiling water. NP330 / NP335 give quality drinking water almost instantly.

02 Sleek and compact, this water purifier takes up minimal space on the kitchen countertop, freeing up more space in your kitchen.

03 Convert tap water into clean and quality drinking water at just a fraction of the cost of bottle water.

04 Through the filtration process, enjoy alkaline antioxidant water with HydroPlus® Filter of purified energy water with HydroPure™ Filter.

# QUALITY WATER

## ANYTIME, ANYWHERE

WITH NOVITA HYDROPLUS® PORTABLE RANGE

Augment your drinking experience with the novita HydroPlus® Water Pitcher from the Melanite Series.

Discover the 4 rewarding HydroPlus® properties as this portable water pitcher NP3290UF transforms normal tap water into alkaline antioxidant water and energy water of smaller molecules cluster size. Promoting body pH balance and slowing down oxidation, excellently hydrate, energize and detoxify the body. Enhanced with advanced ultra-hollow membrane that effectively removes suspended particles up to 0.1 microns and up to 99.9% of E.Coli, be assured of quality water of national standard with the 4-Step Ultra Filtration process.

A cut above the rest, set the trend now and drink quality water the savvy way.

- Advanced Ultra Hollow Membrane Filter\*
- Fast Flow Rate of ± 3 min/500 ml\* of HydroPlus® Alkaline Antioxidant Water

W265 x D92 x H272 mm | 619 g

\*Applicable to NP2290UF Filter.

 [novita.com.sg/web/NP2290UF](http://novita.com.sg/web/NP2290UF)

**HydroPlus®**

COLOURS AVAILABLE

-  PERIWINKLE PURPLE
-  BUTTERCUP YELLOW
-  SKY BLUE
-  GOLDENRAY ORANGE
-  SPRING GREEN
-  DAISY WHITE

the **PETALI** SERIES

WATER PURIFIER

# NP6610

**MADE IN KOREA**

- 6-Step Comprehensive Filtration
- HydroPlus® Properties
- No Electricity Required
- Standalone Unit
- Operational Ease
- Cost Efficient

W253 x D278 x H485 mm | 4.0 Kg

**HydroPlus®** 

CERTIFICATIONS

-  Korea Water Purifier Industry Cooperative

# SPECIFICATION

## HYDROPLUS® PREMIUM WATER IONIZER

Model Name	pH Range (Alkaline)	ORP Range	Electrodes Plates
NP9901	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 (pH 8.5 to pH 10.0)</li> <li>Purified Level Inherent from Water Source</li> <li>Acidic Level 1 to 2 (pH 5 to pH 3.5)</li> </ul>	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 [-50 to -200 mV]</li> <li>Purified Level Inherent from Water Source</li> </ul>	3 Platinised Titanium Electrodes Plates
NP9930	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 (pH 8.5 to pH 10.0)</li> <li>Purified Level Inherent from Water Source</li> <li>Acidic Level 1 to 2 (pH 5 to pH 3.5)</li> </ul>	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 [-150 to -300 mV]</li> <li>Purified Level Inherent from Water Source</li> </ul>	5 Platinised Titanium Electrodes Plates
NP9932i	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 (pH 8.5 to pH 10.0)</li> <li>Purified Level Inherent from Water Source</li> <li>Acidic Level 1 to 2 (pH 5 to pH 3.5)</li> </ul>	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 [-150 to -300 mV]</li> <li>Purified Level Inherent from Water Source</li> </ul>	5 Baked Platinised Titanium Electrodes Plates
NP9960i	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 (pH 8.5 to pH 10.0)</li> <li>Purified Level Inherent from Water Source</li> <li>Acidic Level 1 to 2 (pH 5 to pH 3.5)</li> </ul>	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 [-150 to -300 mV]</li> <li>Purified Level Inherent from Water Source</li> </ul>	5 Baked Platinised Titanium Electrodes Plates
NP10000	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 (pH 8.5 to pH 10.0)</li> <li>Purified Level Inherent from Water Source</li> <li>Acidic Level 1 to 2 (pH 5 to pH 3.5)</li> </ul>	<ul style="list-style-type: none"> <li>Alkaline Level 1 to 4 [-150 to -400 mV]</li> <li>Purified Level Inherent from Water Source</li> </ul>	7 Baked Platinised Titanium Electrodes Plates

NOTE: pH & ORP values may vary by  $\pm 0.5$  and  $\pm 150$  mV (for NP9930, NP9932i, NP9960i and NP10000) and  $\pm 0.6$  and  $\pm 100$  mV (for NP9901) respectively, subjected to nature of water source, chlorine concentration and your filter usage. Indicated pH readings are obtained based on pH 7.5 source water. All pH/ORP readings are attained based on quantitative sampling basis.

## HYDROPLUS®/HYDROPURE™ HOT & COLD WATER DISPENSER

Model Name	pH Range (Alkaline)	ORP Reduction	Water Supply
NP3301	<ul style="list-style-type: none"> <li>HydroPlus®: 9.0 <math>\pm</math> 0.5</li> <li>HydroPure™: 7.5 <math>\pm</math> 0.5</li> </ul>	<ul style="list-style-type: none"> <li>HydroPlus®: 100 MV to 200 MV</li> <li>HydroPure™: Inherent from Water Source</li> </ul>	Direct Connection to Piping
NP3302	<ul style="list-style-type: none"> <li>HydroPlus®: 9.0 <math>\pm</math> 0.5</li> <li>HydroPure™: 7.5 <math>\pm</math> 0.5</li> </ul>	<ul style="list-style-type: none"> <li>HydroPlus®: 100 MV to 200 MV</li> <li>HydroPure™: Inherent from Water Source</li> </ul>	Direct Connection to Piping
NP3310i	<ul style="list-style-type: none"> <li>HydroPlus®: 9.0 <math>\pm</math> 0.5</li> <li>HydroPure™: 7.5 <math>\pm</math> 0.5</li> </ul>	<ul style="list-style-type: none"> <li>HydroPlus®: 100 MV to 200 MV</li> <li>HydroPure™: Inherent from Water Source</li> </ul>	Direct Connection to Piping

NOTE: pH & ORP reduction may vary, subjected to nature of water source, chlorine concentration and your filter usage. Indicated pH readings are obtained based on pH 7.5 source water. All pH/ORP readings are attained based on quantitative sampling basis. ^ Based on average 10 litres a day usage. °Based on average 24 hours a day, 7 days a week usage

## HYDROPLUS®/HYDROPURE™ COUNTERTOP WATER PURIFIER

Model Name	pH Range (Alkaline)	ORP Reduction	Water Supply
NP330 / NP335 with Faucet	<ul style="list-style-type: none"> <li>HydroPlus®: 9.0 <math>\pm</math> 0.5</li> <li>HydroPure™: 7.5 <math>\pm</math> 0.5</li> </ul>	<ul style="list-style-type: none"> <li>HydroPlus®: 100 MV to 200 MV</li> <li>HydroPure™: Inherent from Water Source</li> </ul>	Direct Connection to Piping

NOTE: pH & ORP reduction may vary, subjected to nature of water source, chlorine concentration and your filter usage. Indicated pH readings are obtained based on pH 7.5 source water. All pH/ORP readings are attained based on quantitative sampling basis. ^ Based on average 10 litres a day usage.

## HYDROPLUS®/HYDROPURE™ PORTABLE WATER PITCHER/WATER DISPENSER

Model Name	pH Range (Alkaline)	ORP Reduction	Water Tank Capacity
NP3290UF / NP3290	7.5 to 9.0	Up to 250 mV	<ul style="list-style-type: none"> <li>Reservoir Tank: 1.0 Litre</li> <li>Storage Tank: 1.25 Litres</li> <li>Total Tank 2.25 Litres</li> </ul>
NP2290UF / NP2290	7.5 to 9.0	Up to 250 mV	<ul style="list-style-type: none"> <li>Reservoir Tank: 1.0 Litre</li> <li>Storage Tank: 1.25 Litres</li> <li>Total Tank 2.25 Litres</li> </ul>
NP6610	7.5 to 9.0	Up to 200 mV	<ul style="list-style-type: none"> <li>Reservoir Tank: 6.0 Litre</li> <li>Storage Tank: 10.0 Litres</li> <li>Total Tank 16.0 Litres</li> </ul>

NOTE: pH & ORP reduction may vary, subjected to nature of water source, chlorine concentration and your filter usage. Indicated pH readings are obtained based on pH 7.5 source water. All pH/ORP readings are attained based on quantitative sampling basis. \*Filtration flow rate may vary by  $\pm 1$  minute for non-UF filter and  $\pm 2$  minutes to UF filter subjected to nature of water source and your filter usage.

## FAUCET WATER PURIFIER

Model Name	Water Supply	Minimum Dynamic Water Pressure	Filter Type
NP180	Direct Connection to Faucet	70 KPa	Faucet Water Purifier Filter Cartridge
NP200	Direct Connection to Faucet	70 KPa	Faucet Water Purifier Filter Cartridge

NOTE: °Filtration flow rate may vary, subjected to nature of water source, pressure and your filter usage.

Water Supply	Filter Type	Filter Capacity
Direct Connection to Faucet or Piping	<ul style="list-style-type: none"> <li>Standard Advanced Ultra Hollow Membrane Filter NP9001UF</li> </ul>	3000 Litres (Up to 12 Months, Based On 10 Litres/Day Usage)
Direct Connection to Faucet or Piping	<ul style="list-style-type: none"> <li>Hi-Performance Advanced Ultra Hollow Membrane Filter NP9009UF</li> <li>Standard Advanced Ultra Hollow Membrane Filter NP9002UF</li> </ul>	3600 Litres (Up to 12 Months, Based On 10 Litres/Day Usage)
Direct Connection to Faucet or Piping	<ul style="list-style-type: none"> <li>Hi-Performance Advanced Ultra Hollow Membrane Filter NP9009UF</li> <li>Standard Advanced Ultra Hollow Membrane Filter NP9002UF</li> </ul>	3600 Litres (Up to 12 Months, Based On 10 Litres/Day Usage)
Direct Connection to Faucet or Piping	<ul style="list-style-type: none"> <li>Hi-Performance Advanced Ultra Hollow Membrane Filter NP9009UF</li> <li>Standard Advanced Ultra Hollow Membrane Filter NP9002UF</li> </ul>	3600 Litres (Up to 12 Months, Based On 10 Litres/Day Usage)
Direct Connection to Faucet or Piping	<ul style="list-style-type: none"> <li>Hi-Performance Advanced Ultra Hollow Membrane Filter NP9009UF</li> <li>Standard Advanced Ultra Hollow Membrane Filter NP9002UF</li> </ul>	3600 Litres (Up to 12 Months, Based On 10 Litres/Day Usage)

Applicable Water Inflow Pressure Range	Filter Type	Filter Capacity
