

# 1st 4 Storage

## HEALTHCARE STORAGE SYSTEMS

Innovative Storage Specialists

**1st 4 Storage** is a truly independent storage supplier. We endeavour to procure our products from the best UK manufacturers within the industry, who produce their products in the most environmentally friendly way. Some of our steel storage products are manufactured from 90% recycled materials.

We tailor our designs with products that best suit your individual needs, giving you the best and most cost effective solutions.

We will support your project from start to finish by using our dismantle and environmental disposal service. With our clean and paint service and our full installation service you can be assured of a positive and cost effective conclusion.

### Availability and Delivery

Our standard stock range of shelving, racking and lockers is available on 5-7 day delivery. Many special project items are also available on a fast track delivery.

Our warehouse in Kimbolton, Cambridgeshire holds 100's of different stock lines of storage and office furniture. Advanced computer technology controls the stock levels and all ordering and delivery processing, allowing us to provide an unbeatable delivery service.

### Office Furniture On-Site Assembly

Expert assembly of your office furniture is undertaken as a standard feature of our delivery. This is a cost-free service to mainland GB locations. Our operations team understands your needs and draws on years of experience in their work, providing a useful and efficient assembly service.

Please ensure sufficient clear space is available on-site for our fitters to unpack and assemble.

Efficient assembly is complemented by full packaging removal and recycling. Yet another way in which 1st 4 Storage will exceed your expectations, helping to build a lasting partnership.

### Storage Equipment Installation

1st 4 Storage installers are all SEIRS and CSCS card-holders.

The Storage Equipment Installers Registration Scheme (SEIRS) operated by SEMA is endorsed by the HSE to promote and develop nationally recognised health and safety standards and training in the storage equipment installation industry.

The Construction Skills Certification Scheme (CSCS) card lists the holder's qualifications and demonstrates that they have health and safety awareness as all cardholders have to pass the appropriate CITB-Construction Skills Health and Safety Test.

### Removal & Recycle

We are firmly committed to recycling and we offer a greener alternative to the landfill disposal option. We can remove existing furniture and storage to resolve a logistical and environmental headache.

We use a registered waste carrier and can remove and recycle your old furniture and storage items, from a single desk to a full room clearance.

For larger clearances the cost is on a job by job basis and will depend upon quantity and location of the items. To take advantage of this greener service, please contact us for a survey and quotation.

# Our Service Commitment

## Analysis and Consultation

We begin with an assessment of your current stock holding, space utilization and working practices. After full consultation with staff members we design an individual concept based on our experience and your needs. A full site survey will be carried out prior to planning and costing

## Design & Costing

Our planning service gives you layout plans, drawn to scale, showing the exact products included in your quotation.

## Installation

Our project manager will work with you to ensure that your system is delivered on time to enable our installation team to fit and clean the area ready for use.

## Anti-microbial Protection

Unlike anti-bacterial sprays and chemical disinfectant which rely on repeated use, the anti-microbial protection used on 1st 4 Storage products contains anti-bacterial agents uniformly distributed throughout the coating allowing anti-microbial efficacy through out the life of the coating.

# WardStor Shelving Systems

1st 4 Storage has been working closely with, Kettering General Hospital NHS Trust and other general hospitals as they implement their *Productive Ward- Releasing Time to Care*® Programme\*.

We recognise that with limited storage space and the constant need to access vital consumables on-ward, we need a storage system to suit.

WardStor has been designed with the help of Productive Ward Matrons to create tailor made storage facilities to meet the precise needs of medical and nursing staff at ward level, where it matters most.

## WardStor features:

- High density, space-saving storage.
- Allows fast access and selection of vital medical supplies.
- Increased efficiency in stock rotation.
- Lockable doors for security.
- Plastic drawers, washable & hygienic.
- Floor spillage access for cleaning.
- Strong steel shelving system.
- Hard-wearing and reliable.
- Unique identification labelling for easy recognition.
- Anti-bacterial coating for the most stringent hygienic environment.

\* *Productive Ward – Releasing Time to Care*® is a registered trademark and the property of the NHS Institute for Innovation and Improvement. Our involvement with these projects does not constitute endorsement of our products by the NHS Institute or other NHS body.

# HealthStor Storage Systems

Our MDB HealthStor range meets the everyday needs of the healthcare environment. It is robust, durable, offers ergonomic designs and it looks good!

It is available in a wide range of colours and finishes and includes floor mounted and wall hung storage units, cupboards, drawers, worktops and shelving. A range of fittings, fixtures and specialist joinery adds to the finished effect.

Our HealthStor HTM 63 range offers a unique selection of suspended storage units and worktops which are manufactured to a high specification.

The suspended units are ideal for theatre suites and where a rigid floor cleaning regime is required.

Laboratory furniture further complements our range

Our HealthStor HTM 71 range offers space saving storage ideal for consumables and equipment.

The range includes tall units, base units, wall units, specialist cupboards and a wide range of accessories.

# WallStor Storage Systems

The WallStor shelving system offers a range of specialist shelving to suit any requirements. It can be quickly adapted to suit changing needs.

- A quick and easy to build system
- Elegant and sturdy construction
- Available in a wide range of colours
- Fully adjustable individual shelves
- Full range of optional accessories

The WallStor bin panel is ideal for where hygiene is paramount. The system is fully washable, has a smooth finish and is highly durable.

This clear-view system offers easy product selection and stock levels can be ascertained at a glance.

## Controlled Drug Cabinets

- Manufactured to meet “the Misuse of Drugs (Safe Custody) Regulations 1973”
- 1.5mm mild steel construction with seamless welding and adjustable shelves
- Pick and drill resistant single point locking—key retaining cylinder locks conform to BS3621
- Unique key profiles with 250,000 variants per profile
- Durable epoxy/polyester powder coated finish is easy to keep clean and hygienic
- Holes in rear allow cabinet to be easily fixed to the wall

# Nurses Station & Reception Area

## First Impressions Count!

Use our exceptional range of reception furniture to create an open, welcoming yet professional and functional reception at a price to suit any budget.

This range of furniture is manufactured to the highest quality specifications and can be specified for wheelchair users.

WOW! your visitors with a fully bespoke reception unit .

## Stylish Cost Effective Seating

This range offers seating solutions for everything from small meeting rooms to waiting rooms.

Comfortable economical practical stacking chairs with generous seat and back size.

Stakka—Choice of frame finishes and fabric colours.

Renoir—Individual moulded cushions. Beechwood laminate frame.

## Desking At Its Best

An extensive range of desks and tables to meet all office needs and budgets.

The range is complemented by a matching selection of storage pedestal and cupboards.

Our operator and task chairs offer that finishing touch and provide the right posture for tasks in the workplace.

# Nurses Station & Reception Area

Our range of steel storage units is versatile and offers storage for paper, files and media of all sizes and types.

Tambour door and two door cupboards maximize space utilization and a range of internal fittings are available.

A high quality range of filing cabinets that are both strong and stable.

Features include recessed handles and drawer label holders, central locking and anti-tilt to prevent more than one drawer

A comprehensive range of personal and equipment storage lockers incorporating the world class anti-bacterial technology in the plastic features and the activecoat powder coating.

Features include

- Integral air vent system
- Micro sprung disc lock
- 5 knuckle hinges
- Welded front frame
- Internal door strengtheners

**AC+IVECOAT**  
anti-bacterial technology

# Specialist Storage Systems

Stainless steel shelving is uniquely durable and corrosion resistant.

Grade 304 stainless steel is used in this shelving, but we are able to supply other grades of stainless steel ( i.e. 316, 420) subject to quantity.

Popular sizes are available from stock and we are able to modify standard designs for specialist shelving and racking applications.

Wire shelving allows good ventilation in accordance with the Central Sterilising Supply Unit (CSSU).

This shelving and racking system is available in a bright chrome finish which is durable and attractive.

An additional epoxy seal gives the shelving resistance to damp environments, ideal for cold-rooms.

AliStor shelving is constructed using anodised aluminium frame and beam sections with polyester shelving panels.

The hygienic shelving design and lift-out shelf decking that AliStor offers makes it ideal for where regular cleaning is important.

The AliStor shelving units can also be made mobile so that floors and walls can be cleaned easily.

Tel : 01480 896778 email : sales@1st4storage.co.uk

**1st 4 Storage**

# Specialist Storage Systems

## Cold Room Storage

We offer 2 types of shelving system depending on the temperature and moisture content of the room.

- Epoxy seal chrome wire for damp environments
- Powder coated steel shelving used in pathology

For the busy pharmacy, where accurate location of drugs and other consumables is critical, a choice of static shelving systems are available.

Mobile systems extend the capability of the shelving system in a format that significantly reduces the use of floor space for storage.

We offer a range of pharmacy storage systems to suit all needs.

To complement the storage range we also supply specialised Pharmacy Refrigerators.

ClearStor offers a wide choice of equipment including:

- Complete range of shelving, hanging and drawer units
- Cabinets with purpose designed drawers
- Glazed doors with or without UV filter
- Special linings
- Dust free seals
- Mobile storage for improved floor utilisation

# Medical Records Storage

## Efficient Storage = Efficient Retrieval

All our storage solutions are designed to offer optimum access while maximising available space.

With a need to file and consult high volumes of patient medical records on a regular basis, this system offers a unique storage solution, ideal for hospitals and healthcare practices.

Mobile shelving units are the most effective way to create high density storage where space is at a premium.

- Easily opened for file storage and retrieval
- Only one access aisle needed
- Choice of manual or electronic
- Choice of finishes to complement surroundings.

We also offer a range of trolleys to suit medical file transportation

# Medical Records Storage

We offer a range of storage solutions for Lloyd George files. They can be stored within Lloyd George boxes which then fit neatly onto the shelves to provide a high density solution for surgery, medical and health centre requirements.

A popular solution is the pull out drawer system, which has dividers to keep files in one run within the drawer. Several runs are included within one drawer. This system can be lockable for added security.

We supply Lloyd George Boxes direct from our warehouse stock.

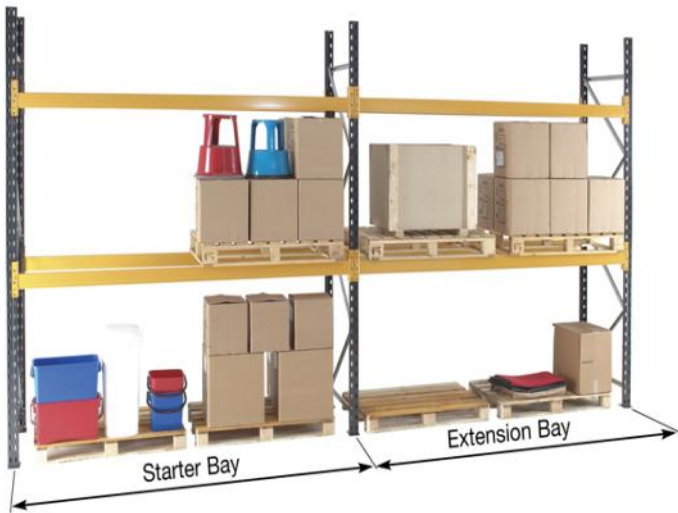

Static shelving offers a standard storage solution for Lloyd George Boxes.

Installation of a mobile shelving system can increase the number of files and boxes by up to 50%, all within the floor space occupied by a static shelving system.

So if you need more storage and have no more room a mobile storage solution could be the answer.

# Goods Inward Storage

Our low level pallet racking can free up the floor space used by pallets.

Pallets normally stored on the floor can have storage levels above, which can then be utilised to store further pallets or have a shelf panel fitted to allow loose item and box storage.

Good quality pallets are necessary to ensure safe storage on pallet racking.

Longspan shelving is the ultimate versatile heavy duty storage system.

This system is limited only by your imagination, whether you're planning a simple low-rise set up or a large scale heavy duty storage facility.

Ideal for storing crates, boxes, medical consumables and much more.

## General purpose shelving

- Quick and easily assembled requiring only a rubber mallet
- Offers a fast and economic solution to everyday storage
- In a range of colourful finishes or pre-galvanite
- 18mm chipboard shelves
- Ready to build units direct from our warehouse

# Goods Inward Storage

## Steel Mesh Security Storage

- Secure storage for theft-prone goods or materials
- Contents fully visible through mesh sides
- Modular design for quick and easy installation on site
- Cages can be expanded and added to at a later date
- Hot dipped galvanised panels available for outdoor applications
- Tough grey RAL 7037 powder coating for indoor use
- Padlock facility fitted to outside of door - padlock not supplied

Our range of benches and workstations are designed to ensure the operator is working at the correct sitting or standing working height.

- Fixed height
- Adjustable legs
- Crank adjustable
- Mobile with castors
- Drawers
- Pigeon holes
- Cupboards
- Choice of worktops

Our wide range of high quality cupboards and cabinets offers specialised storage for:

- Hazardous substances
- Toxic substances
- Corrosive substances
- Medical equipment
- PPE
