Polytunnel Covers

SuperThermic SteriLite / SunMaster

For all crops which will be heated. Where the benefits of UV blocking IPM will be an advantage. ie: Organic growing. UV blocking is proven to reduce fungal & aphid attacks & give a greater foliage area

SunMaster Diffused / Clear

For all crops where colour especially red & blue is important. Over wintered nursery stock where only slight frost protection is required.

SunSmart Green / Blue

For all crops which are natural shade loving plants. Naturally gives height reduction with-out using chemicals in Spring (Blue)

SunMaster DuraLite

Designed for all soft fruit & stone fruit as well as cut flowers. Ideal for Spanish / French field tunnels & commercial fruit growers.

Side Vent Polythene

Our side vent films are not a light weight product but full specification Sun Master Diffused- UV open film.

Tunnel Repair Tape

A strong durable tape used to repair damaged tunnel covers. All roll sizes are 25m in length
Roll Sizes: 25mm / 50mm / 75mm / 100mm / 150mm

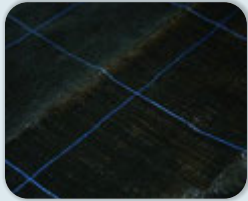

*All Polytunnel covers come in widths of: 7.3 / 9.2 / 11.1 / 14m & any Length

Anti Hot Spot

PE Foam tape coated on one side with a temperature resistant Acrylic Adhesive. The non adhesive tape has a durable Mylar film. Designed to cushion and insulate your poly tunnels. All roll sizes are 9m in length. Roll Sizes: 19 / 25 / 30 / 50mm

Ground Covers

Ground covers are used for weed control allowing air & water to permeate. The woven grid lines assist plant display. Widely used in: Nurseries, poly tunnels, patios & paved areas. Grids are 25cm with lines for easy pot placement

Capillary Matting

Produced from recycled fibres of cotton and wool, offering good water holding properties at a lowcost. Ideal for use on benches or on the ground, keeping plants moist, to avoid over watering and drought.

Mulctex

Specifically designed for & extensively used by landscapers & horticulture alike, Made from a black spun bonded polypropylene, with high levels of UV stabiliser, it acts as a weed barrier & enables easy planting by pre-cutting cross holes in the fabric.

Thermagro Fleece

Thermagro Fleece has been tried and tested in the toughest of climates. Due to its unique construction it regulates the temperatures through day and night. This gives your crop the added protection, allowing for a much improved, earlier yield. Also available in heavier gauge for field crops in various sizes.

Windbreak & Shade Netting

Windbreak available in standard net form or extruded heavy duty for protecting crops. Available in black or green. Shade netting is a cost effective means of immediate shade to protect your crops and plants.

Seed Trays (Standard range)

Heavyweight version.

Formed from 0.75mm thickness material. These trays still hold a premier position in the trade for quality and design. The two level drainage system allows for both overhead and sub-irrigation systems.

Internal measurements 344 x 214 x 52mm. Volume 3.8 litres.

We also stock heavy weight seed trays without holes to be used as Gravel Trays.

Lightweight version.

The same design as the above but formed from 0.54mm thickness material for use with Vacapots or Vacapak inserts. The large majority of our seed-tray sales are of this lightweight version.

Shallow Seed Tray. This seed tray has a depth of 35mm to fit our Vacapot 60/35s.

Packed 150 per case.

Packed 200 per case.

Half Trays

Half trays can be used with or without a seed tray. They have two levels of drainage. All edges are rolled down for improved safety when handling. Internal measurements 154 x 205mm.

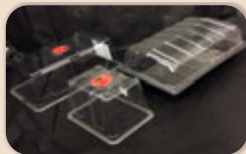

Volume 1.46 litres.

Packed 500 per case.

Propagator Lids

Fits standard size seed trays & half trays. Available in ridged, vented or unvented also lightweight apexed or flat for easy stacking.

Vacapaks

Available in units having four or five sections per tray. Each section is semi-separated and can be broken away at the point of sale.

Vacapots

Vacapots offer a greater variety of cell size. Vacapots that are 52mm deep fit flush to the top of a seed tray for easy soil filling. Please note we supply certain Vacapots in different depths as detailed in table below. The Vacapot 8 is produced with depths of 52mm or 70mm. Please state clearly which depth you require when ordering.

Vacapot 60/35
Packed 200 per case

Vacapot 60/35 .

We supply a version of the Vacapot 60 with a reduced depth of 35mm. Available in cut & uncut versions. These could be used as a cheap alternative to plug trays. Popular for growing salad crops.

Vacapots packed 200 per case - including Vacapot 60/35. Vacapot 60 (52mm deep) packed 150 per case.
