

# Infant Class Newsletter – 24<sup>th</sup> January 2020

Our new build is now up and running, and the children are loving exploring the new areas to play and learn.

Zoolab visited this week and we got to meet a corn snake, tarantula, giant African land snail, giant millipede and a rat. The children enjoyed learning these facts:

The tarantula has 8 eyes and 8 legs.

The giant African land snail can grow to its full size which is about the size of a human head.

The corn snake smells with it's tongue.

The rats have been trained to help in hospitals and find bombs.

The millipede gets 4 new legs every year!
